Net banking income

Q3 20: Global Banking & Investor Solutions' revenues were up +1.0% (+2.5%* when adjusted for changes in Group structure and at constant exchange rates) at EUR 2,034 million and rebounded +8.2% (+10.8%*) compared to Q2 20.

In Global Markets & Investor Services, net banking income totalled EUR 1,245 million, up +4.5% (+6.3%* when adjusted for changes in Group structure and at constant exchange rates) vs. Q3 19.

Fixed Income & Currencies delivered another solid performance, with revenues of EUR 569 million, up +9.4% vs. Q3 19. Market conditions have normalised compared to H1 20. The solid Q3 performance was driven in particular by healthy activity with European corporate clients, higher revenues in the Americas region and in flow & hedging activities.

There was a sharp rebound in Equity activities, with net banking income 3.7 times higher than in Q2 20, and up +5.1% vs. Q3 19. Flow & hedging activities performed well in Q3, and the Asia and Americas regions enjoyed strong volumes. There was a gradual recovery in equity structured product revenues vs. Q2 20, impacted by the current reduction in the risk profile. The good performance of listed products helped offset this impact.

The implementation of decisions following the strategic review of equity and credit structured products is under way:

- Reducing the risk profile of these products in line with the plan with, in particular, a decrease in the exposure to the most complex products
- Maintaining the leadership position on the investment solutions franchise

Securities Services' assets under custody amounted to EUR 4,328 billion at end-September 2020, up +2.1% vs. end-June 2020. Financing activities were adversely affected by the slowdown in aircraft and property financing.

After a second quarter marked by the crisis and a decline in volumes, Global Transaction and Payment Services posted a better performance than in Q2 20, benefiting from a rebound in commissions.

Asset and Wealth Management's net banking income totalled EUR 210 million in Q3 20, down -3.7% vs. Q3 19 (-3.7%* when adjusted for changes in Group structure and at constant exchange rates).

Lyxor's net banking income amounted to EUR 53 million, up +10.4% vs. Q3 19. It rebounded by +32.5% vs. Q2 20, driven by the ETF segment and the rebound in equity markets. Lyxor's assets under management totalled EUR 133 billion at end-September 2020. Lyxor's varied ESG ETF offering contributed to the increase in net inflow in the first nine months.

Private Banking posted a performance that was 7.3% lower in Q3 20 than in Q3 19, with net banking income of EUR 153 million. Revenues were hit by market conditions and weaker activity. Assets under management were stable in Q3 20, at EUR 114 billion. Net inflow totalled EUR 1.8 billion in the first nine months of the year, driven by France.

10. APPENDIX 2: METHODOLOGY

1 – The financial information presented in respect of Q3 and 9M 2020 was examined by the Board of Directors on November 4th, 2020 and has been prepared in accordance with IFRS as adopted in the European Union and applicable at that date. This information has not been audited.

2 – Net banking income
The pillars' net banking income is defined on page 43 of Societe Generale's 2020 Universal Registration Document. The terms "Revenues" or "Net Banking Income" are used interchangeably. They provide a normalised measure of each pillar's net banking income taking into account the normative capital mobilised for its activity.

3 – Operating expenses
Operating expenses correspond to the "Operating Expenses" as presented in note 8.1 to the Group's consolidated financial statements as at December 31st, 2019 (pages 423 et seq. of Societe Generale's 2020 Universal Registration Document). The term "costs" is also used to refer to Operating Expenses.
The Cost/Income Ratio is defined on page 43 of Societe Generale's 2020 Universal Registration Document.

4 - IFRIC 21 adjustment
The IFRIC 21 adjustment corrects the result of the charges recognised in the accounts in their entirety when they are due (generating event) so as to recognise only the portion relating to the current quarter, i.e. a quarter of the total. It consists in smoothing the charge recognised accordingly over the financial year in order to provide a more economic idea of the costs actually attributable to the activity over the period analysed.

5 – Exceptional items – Transition from accounting data to underlying data

It may be necessary for the Group to present underlying indicators in order to facilitate the understanding of its actual performance. The transition from published data to underlying data is obtained by restating published data for exceptional items and the IFRIC 21 adjustment.
Moreover, the Group restates the revenues and earnings of the French Retail Banking pillar for **PEL/CEL provision allocations or write-backs**. This adjustment makes it easier to identify the revenues and earnings relating to the pillar's activity, by excluding the volatile component related to commitments specific to regulated savings.
The reconciliation enabling the transition from published accounting data to underlying data is set out in the table below:

6 - Cost of risk in basis points, coverage ratio for doubtful outstandings

The cost of risk or commercial cost of risk is defined on pages 45 and 574 of Societe Generale's 2020 Universal Registration Document. This indicator makes it possible to assess the level of risk of each of the pillars as a percentage of balance sheet loan commitments, including operating leases.

	(In EUR m)	Q3 20	Q3 19	9M 20	9M 19
French Retail Banking	Net Cost Of Risk	130	95	821	318

	Gross loan Outstandings	521,822	504,647	518,033	501,813
	Cost of Risk in bp	40	26	67	24

The **gross coverage ratio for doubtful outstandings** is calculated as the ratio of provisions recognised in respect of the credit risk to gross outstandings identified as in default within the meaning of the regulations, without taking account of any guarantees provided. This coverage ratio measures the maximum residual risk associated with outstandings in default ("doubtful").

7 - ROE, ROTE, RONE

The notions of ROE (Return on Equity) and ROTE (Return on Tangible Equity), as well as their calculation methodology, are specified on page 45 and 46 of Societe Generale's 2020 Universal Registration Document. This measure makes it possible to assess Societe Generale's return on equity and return on tangible equity.

RONE (Return on Normative Equity) determines the return on average normative equity allocated to the Group's businesses, according to the principles presented on page 46 of Societe Generale's 2020 Universal Registration Document.

Group net income used for the ratio numerator is book Group net income adjusted for "interest net of tax payable on deeply subordinated notes and undated subordinated notes, interest paid to holders of deeply subordinated notes and undated subordinated notes, issue premium amortisations" and "unrealised gains/losses booked under shareholders' equity, excluding conversion reserves" (see methodology note No. 9). For ROTE, income is also restated for goodwill impairment.

Details of the corrections made to book equity in order to calculate ROE and ROTE for the period are given in the table below:

ROTE calculation: calculation methodology

End of period	Q3 20	Q3 19	9M 20	9M 19
